Horse Name: _____ Race # _____ Position _____

Horse Name: _____ Race # _____ Position _____

Horse Name: _____ Race # _____ Position _____

HOW IT WORKS

Each race has ten furlongs. A "horse" advances one furlong at a time based on the horses' numbers on the random number generator wheel. The horse crossing the finish line (10th furlong spot) first is the winner of that race.

There are two ways you can play the horses and walk away a winner:

1. Enter your own "horse" (\$25 registration fee per horse) in any or all of the ten races. There will be 12 horses per race. You can name your horse, select the race and post position (depending on availability at the time you register). The winning owner takes home \$100!
2. Bet on the horses on the track before the window closes for each race. Bets are \$2.00 each. There will be only one winning horse (i.e., no winnings for place or show). Winners split half the betting total for that race.
